## LOUISVILLE FILLED WITH OIL MEN

All Very Enthusiastic Over the Kentucky Oil Field Developments.

LOUISVILLE, Ky., Feb. 21.—Mr. Roy D. Buckley, of Louisville, returned Saturday night from a week's trip to Muhlenberg, Hopkins and Christian counties. He reports that the Ohio Oil Company's deep test in Muhlenberg County will be drilled 400 feet deeper, making the depth about 1,950 feet. The Hermitage Oil Company will resume drilling in Hopkins County at once. The Ohio Company and Indian Refining Company are drilling deep tests in Christian County, between White Plains and Crofton.

Madisonville (Ky.) parties are moving a rig to Christian County, near White Plains, and will commence drilling at once.

There is considerable interest in Lewis County, Ky. The Cabin Creek Oil & Gas Company, with offices in Maysville, Ky., are drilling on the Cabin Creek lease, near Tolesboro. This company has about 5,000 acres under lease in Lewis County. They will put down three or four wells, drilling to the shallow depth.

The Ohio Cities Oil Company is preparing to drill immediately in Lewis County. This company has about 7,000 acres under lease. It is reported that they will go after the deep drilling.

It is also reported that an Alabama Oil Company has taken over considerable leases in Lewis County, and will commence drilling in the near future.

The Rita Oil Company, with offices at No. 6 Hubert Block, Cincinnati, Ohio, has several thousand acres of select leases in Lewis County, and intend to drill again in the spring.

The Pelican Oil Company, on its Susan Moore lease, in Allen County, suffered quite a loss by fire last week. Due to fire caused by an explosion of gas they lost their entire battery of tanks, including about 1,250 barrels of oil, boiler house, equipment, etc. This will all be rebuilt on top of the hill, instead of in the hollow as before, so that there will be no danger of further fires from this source. While the fire was still raging, President Noe, of the Pelican, was busy re-ordering tanks, equipment, etc., and the rebuilding of the tanks was commenced the next morning. Mr. Noe states that they began pumping oil again Wednesday, February 19.

The Hamilton Oil Company, on the next lease, the J. R. Johnson farm, also suffered from the same fire, losing their tanks, with about 2,500 barrels of oil. The American Pipe Line Company also suffered the loss of their boiler house and pumping house.

The Majestic Oil Company of America, with offices in the Realty Building, Louisville, has acquired valuable Lee County acreage, comprising 62 acres, the John Ashcraft tract, with two producing wells, power, tanks, pipe lines and all equipment.

This now gives the company seven producing wells, four more drilling, eleven more contracted for, and four drilling rigs now in operation. The John Ashcraft tract is in that part of Lee County where the "big stuff" prevails. It joins the Shearer lease of the Hopewell Petroleum Company, and is within 2,500 feet of the Della Hargis lease of the McCombs Producing & Refining Company. The Ashcraft wells are completely equipped and pumping oil daily, and a drilling rig is now on the lease, and well No. 3 will be started at once.

The map published in the advertisement of the Majestic Oil Company, which appears elsewhere in this issue, shows the exact location of the Ashcraft tract, and gives other interesting information about the progress and policy of the company.

Mr. Patrick H. Orr, prominent business man of Atlanta, Ga., who has been in Louisville for several days, went over to Winchester during the week. Mr. Orr is becoming interested in the Kentucky oil fields, and is gathering first-hand information. Mr. Orr called in at the offices of THE OIL WORLD in Louisville recently, and stated that the

oil field in this State was certainly a promising one, and that he believed, while it has reached big proportions at the present time, that it was still in its infancy. Mr. Orr is a regular subscriber to THE OIL WORLD, and remarked that he was more than pleased with the excellent way in which the oil news from all over the State was handled in the paper.

The Merchants Oil Company, with offices in the Inter-Southern Building, Louisville, has acquired a substantial interest in the W. E. Williams tract of 172 acres, located in the Seattle district, of Allen County. This company has two offset wells to drill at once. After February 22, the Merchants Oil Company advance the price of their stock to 75 cents per share, and after March 15, it goes to \$1.00 per share, as will be seen by reference to the advertisement which appears elsewhere in this issue.

People from all over the State of Kentucky, as well as many from surrounding states, interested in the oil developments in Kentucky, are daily visitors at the offices of THE OIL WORLD, 120 South Fourth Street, Louisville. Most of them, if not already on the subscription list of THE OIL WORLD, are pursuing the wise, safe policy and enrolling their names as regular subscribers.

Well No. 2 of the Wentworth Oil Company, on the Gurley-Sutton and Harris lease, in Lee County, is in and good for 100 barrels. Drilling was to a depth of 1,192 feet and the oil rose 700 feet in the hole. The rig will be moved at once to No. 3 location.

Mr. Chas. V. Carter, of the W. P. Williams Oil Corporation, with headquarters in Lexington, called in at the offices of THE OIL WORLD while on a business trip to Louisville during the past week.

Mr. Felix Renick, general manager of the refining branch of the McCombs Producing & Refining Company, left Wednesday for East St. Louis, Ill., where the refinery is located. Mr. Renick will return to Louisville Sunday.

The Old Dominion Oil Company's No. 3 Nannie Bryant, is in, and, after a shot, the oil was flowing through the casing. No. 4 of the Old Dominion, Liberty Bryant, is a 250-barrel producer.

Mr. Eugene Focht, and his partner, Mr. E. H. Fuller, of Lexington, were visitors at the offices of THE OIL WORLD in Louisville, on a recent business trip to the Falls City.

Mr. A. L. Corbitt, president of the Victory Oil Company, has returned to the offices of the company in Louisville after a trip to Lexington for his company.

Mr. A. O. Self, president of the Kytex Oil Company, with offices in the Starks Building, in Louisville, spent several days in Winchester during the week on business.

Messrs. C. B. Strother and Phil Coulter, of Winchester, were visitors during the week at the offices of THE OIL WORLD in Louisville.

Mr. Willett Groover, the well-known oil man, of Winchester, was in Louisville during the week, and paid a visit to the offices of THE OIL WORLD.

Mr. Olcott Payne, of Olcott Payne & Company, spent Monday at the Louisville office of his company, and left Tuesday for Winchester, where he remained several days looking after the interests of the Quaker Oil Company.

Quite an interesting picture of a Texas Coastal gusher appears in the advertisement of the Kytex Oil Company, which will be found elsewhere in this issue.

## KENTUCKY STAR BUYS ACREAGE

The Kentucky Star Oil Company, of which Frank P. James, of Harrodsburg, is president, Victor D. Hardy, of Lexington, vice president, has bought from the Spencer heirs one hundred acres in the Big Sinking section. This lease is valued at more than \$30,000, and adjoins the producing properties of the McCombs Company. The Kentucky Star has leases on more than 4,000 acres in twenty counties, the present production being in Lee, where there are three wells in operation.

A pipe line runs through the property and arrangements have been made to drill on the new lease immediately.

## MUCH DRILLING IN JOHNSON COUNTY

(RALPH STAFFORD.)

PAINTSVILLE, Ky., Feb. 21.—Drilling is going on in four sections of Johnson County, which sections I have referred to before, but which I shall mention in order that the reader may keep posted on the location of the different wells.

One is the Red Bush-Flat Gap section in the northern part of the county and the creeks named in referring to that section will be Laurel (upper Laurel and lower Laurel), Franks Creek, Drakes Fork, Mud Lick and Blaine Creek; another section lies in the western part of the county and is known as the Pigeon Creek field and the creeks to be named in reference to that section are Pigeon Creek, Little Paint Creek, Hargis Creek, Mine Fork, Tick Lick Creek, Literals Fork. A third section is the Upper Big Paint Creek field and may be referred to as the Fish Trap. Elna field and the creeks named in reference to it will be Colvin, McKenzie Branch, Gullett Branch, Low Gap Branch. The other section is the Staffordville or Lower Big Paint Creek section in the central part of the county, and the creeks Rule Branch, Turner Branch, Little Mud Lick, Rock House Fork and Jennie's Creek.

In the Red Bush-Flat Gap field J. C. King & Company, of Cincinnati, have started a well on Frank's Creek on the farm of Lewis Wheeler, J. P. Fishel contractor; L. C. Patterson and associates, of Butler Pa., have got nicely started on their well on the farm of Charley Bailey on Drake's Fork. Mr. Patterson is high on the structure and figures on gas, but King is lower down the structure and will probably strike oil. In this same neighborhood the well on the Charlie Williams farm on Upper Laurel, and the one being drilled on the same creek by A. C. Albin & Co., are nearing completion. There have been no completions in that section this month.

The work in the Pigeon Creek field has been going slowly on account of the building of a pipe line to the field and the attention of the companies has been centered on that work to the exclusion of everything else almost, but there has been one completion, that of White Brothers' No. 2, on Hargis Creek, which came in February 10 a big gasser, with rock pressure of 300 pounds. The gas is now going into the lines from several wells in that section.

The work in the upper Big Paint Creek section is going slowly, but two new wells are to be started soon, one by the L. C. Patterson interests, and the other by Snyder & Stafford, and also it is very likely that S. P. Fetter and associates will start a well in the Upper Big Paint Creek shortly, but that, so far, is only rumor.

In the Lower Big Paint Creek at Staffordville field Snyder & Stafford are getting along nicely with their well on Rule Branch and will, barring accident, get down to the Berea within the next fifteen days. Mr. Snyder is a prominent oil and gas man from Mansfield, Ohio, and Stafford is a local man. They have formed a partnership to drill several wells and will start two more wells in the Staffordville section within the next sixty days.

Several oil men are coming into Paintsville now from all sections of the United States and the talk is that a good deal of new work will be started as soon as the weather gets more favorable. There has been an exceptionally pretty winter here, but in an open winter there is usually more rain so that the roads get bad toward spring, however, the roads are fairly good now and everything points to an early season.

In Magoffin County the work of development is proceeding slowly, although there is considerable activity. There would no doubt be more work going on in Magoffin if it were not for the long distance to haul in the machinery. When the roads get better in the summer there are several wells to be started and it is the intention of the writer to make a special trip over Magoffin County and report conditions. Some parties have written me occasionally asking about that county and for their benefit I mention my intention of making a special trip there.

## GREAT ACTIVITY IN ALLEN COUNTY

SCOTTSVILLE, Ky., Feb. 21.—The past week has been full of activity in all parts of the county, with quite a number of new wells showing up. The field south of Scottsville, all the way to the Tennessee line, is more active than at any other time during the season.

Two promising properties in the south field are the McReynolds, 100 acres, on which there are now eleven wells and no dry holes. No. 7 on this lease is making six barrels per hour. No. 8 is drilling. There are three proven locations that will be drilled up at once. The lease is owned by Captain Mahon, Jack Wells, A. R. Anderson and associates from Duluth. The other lease is the Martin farm, joining on the south, owned by the State Line Oil Company, of Independence, Kansas. No. 5 on this lease, just completed at 266 feet, is making forty barrels. No. 1 is pumping one and one-half barrels per hour. Nos. 2 and 3 are doing better than No. 1. No. 3 is making fifteen barrels. Eight locations have been proven by the drilling. This looks like one of the valuable leases in the Allen County field, and by some oil men it is considered equal to the best in the Gainesville pool. The wells on this lease are not costing over \$1,000 to drill and equip. Pat Sullivan drilled in a nice bumper on the Merideth farm in the Halfway pool.

Ed. List, Dr. Smith and associates, of Gary, Ind., caught a duster on the Nanny Merideth farm in the Halfway pool.

Gust Harlett has a fishing job on the John Mandor farm, four miles south of Scottsville. This is a likely-looking property as it lays along the north side of two locations for two wells on the McReynolds farm.

Captain Mahon is down nearly 200 feet on the Hinton farm, near Adolphus, and has encountered no water. There was a showing at 102 feet.

The Merchants Oil Company, of Louisville, abandoned the first hole on the J. I. Shelton farm, west of Adolphus, as it was crooked. It is down 80 feet.

The DeCaigney boys completed No. 4 on the Bishop Foster farm southeast of Petroleum, which will make twenty barrels. Nos. 1 and 3 are good wells and while No. 2 was a gas well, there is a lot of oil standing in the hole.

Harry Schoonover reports No. 3 on the Wm. Foster farm in the Gainesville pool, completed at 370 feet, 60 feet under shale, making 75 barrels. This is an offset to a 100-barrel well on Dr. Riggs' lease. No. 4 on the Foster farm is drilling.

No. 3 on the Yessie Oliver was completed at 400 feet, and is making 35 barrels. No. 5 is drilling.

No. 3 on the Wm. Nickols, two locations, north of No. 2, which is one of the big wells in the Gainesville pool.

Captain Chaney reports another fine well on the Williams farm, in the Gainesville pool. No. 9 drilled in at 60 feet. This is a 100-barrel well. There are now nine wells on this lease and no dry holes.

Chas. Noe reports a serious loss by fire on the Susan Moore lease in the Gainesville pool. This is the first fire in the oil field in Allen County. The fire blew across to the steaming boiler on a windy day and caught. There were four tanks with 1,000 barrels of oil. The pumping plant and power, and boiler, the loss in equipment, oil, labor and material will run close around \$7,000. There will be another loss in production during the delay in building up. The wells on this lease were just in condition to produce 1,000 barrels daily. The Hamilton Oil Company, on the Johnson farm, reports a \$5,000 loss from the same fire. Attorneys who represented the purchasers have been at Scottsville looking over the titles to the Jim Reed Johnson farm, which lease is owned by the Hamilton Oil Company, of Scottsville. As they reported the titles good, there seems to be no question but what a sale of this famous oil property will be consummated within the next few days. While the owners will make no statement at the present, it is understood that the price is close around a quarter of a million dollars. There are thirteen wells on this lease so far with a daily production of 16,000 barrels at this date per day.

## THIRTY-NINE WELLS REPORTED FOR WEEK

The feature of the week was the bringing in of a well in Warren County by the Himyar people. This well is near the Allen County line and the sand found is reported to be of excellent quality. Thirty-nine wells were reported for the week from Lee, Estill, Wayne, Allen, Warren and Wolfe counties. Drilling operations are progressing favorably, the weather being ideal.

### Lee County.

Atlas Oil Company's No. 4, Medley Cole tract, 50 barrels.

Alakyla Oil Company's No. 3 Jack Spicer farm, 20 barrels.

Nowell & Rogers' No. 1, Martha Reynolds' farm, 300 barrels.

Old Dominion's No. 3, Minnie Bryant farm, 250 barrels.

Old Dominion's No. 4, Minnie Bryant's farm, 300 barrels.

Fletcher Petroleum Company's No. 1, Eureka farm, 75 barrels.

Rex Oil Company's No. 13, Liberty Ryan farm, 300 barrels.

Hudson & Collins' No. 15, L. & P. Stone farm, 250 barrels.

Carter Oil Company's No. 18, D. B. Pendergrass farm, 300 barrels.

Security Producing & Refining Company's No. 5, Millard Estes farm, 50 barrels.

Rex Bundy and others' No. 2, R. Reynolds' farm, 150 barrels.

Woodford Oil Company's No. 5, Crane farm, 150 barrels.

Rex and others' No. 7, John Williams' farm, 200 barrels.

Pyramid Oil Company's No. 10, Clem Williams' farm, 300 barrels.

McCombs & Local No. 8, Rena Butcher farm, 300 barrels.

Rex Hedrick and others' No. 6, John Williams' farm, 500 barrels.

After being shot and cleaned out, the Co-operative Land & Development Company's No. 1, Heironymous lease, previously reported at 25 barrels, is showing for 50 barrels or better, it is reported.

The Carter Oil Company has completed No. 10, R. J. McLyn, which looks to be the best producer on this tract. It has not been shot or pumped, but is credited with being a nice well.

No. 7 Rena Butcher, of the Local Oil & Gas Company and the McCombs Producing & Refining Company has just been shot and is making a showing for 300 barrels. No. 7 Della Hargis is due.

The Cumberland Producing & Refining Company has two rigs at work on the J. G. Williams' tract and is drilling Nos. 3 and 4. Nos. 1 and 2 are splendid wells. This lease contains about 30 acres. On the other side of the same farm they have a good well at No. 1 and are about to complete No. 2, where they have had a fishing job since last May.

No. 4 on the 75-acre Pendergrass farm, belonging to the W. P. Williams Oil Corporation, Young and Stevenson is in and rated as a nice well. They are drilling No. 5 and moving a rig to No. 6. They expect to move two more machines on to this property. Six 250-barrel tanks have been set up here, and the owners just recently completed a camp house on the lease for the employees.

New York parties are gauging the two wells on the Veitch and others lease, adjoining the Flahaven, with a view to closing a trade. They are said to be paying \$250,000 for this property which contains about 100 acres.

The Wright Oil Company has just purchased 100 acres of the Eureka tract belonging to the Fletcher Oil & Gas Company, for \$150 an acre. The lease bought lies just northwest of the Sally Davis, belonging to Carson, Veitch and Hoffman, where No. 5 is just in, reported at 60 barrels. The Wright Oil Company will move on to this property April 1st.

The Wentworth Oil Company has completed No. 2 on the Gourley, Sutton, Harris tract of 112 acres. This is estimated at 100 barrels. H. J. Smith is superintendent of this property.

No. 11 Clem Williams, of the Pyramid Oil Company, is in and reported at 250 barrels. The same company expects No. 3 on the South Pendergrass, shortly, also No. 7 allie Brandenburg, No. 2 on the Charles Pendergrass 20 acres. On the North Pendergrass Nos. 4 and 5 are drilling, also No. 4 Flat Hollow and No. 12, Clem Williams.

On the Spring Hollow lease the Wright Oil Company is drilling No. 5. On the Flahaven Land tract the Ohio Oil Company expects to complete Nos. 22 and 23 next week.

### Estill County.

Bankers Oil Company's No. 9, Hubbard farm, 25 barrels.

Little Doe Creek Oil Company's No. 1, Doe Creek farm, 30 barrels.

W. A. Inez's No. 5, Robert McKinney farm, 5 barrels.

Bent Hickory Oil Company's No. 20, L. C. Roberts' farm, 25 barrels.

Bent Hickory's No. 21, L. C. Roberts' farm, 30 barrels.

On Ross Creek the Bankers Oil Company is drilling in No. 9, which shows promise of being one of the best wells on the lease. This is near the center of the property and will tend to test out still more of this acreage.

The Bent Hickory Oil Company has brought in Nos. 21 and 22, L. C. Roberts, which are credited with 25 barrels.

The Bourbon Oil & Development Company brought in a gasser of some size at their No. 2, Millie Freeman. This is the thirteenth well completed on the Freeman tract and is the first gasser. It is said the well will furnish gas sufficient to supply fuel for the company's camp and possibly also the water-pumping plant on Station Camp Creek, now run by oil. It is claimed this well, which is on the north end of the lease, is too high up the structure for oil, and the company will move its rig some distance south. It is said that the Lincoln Oil & Gas Company is getting increased production as its development extends toward the south end of the farm, although there are some dry holes half a mile farther south.

In the Ross Creek section, the Bankers Oil Company has connected up two wells on the Lee Congleton lease and put them to pumping. They have a third one here to connect and expect to join on to the pipe line next week. No. 8 on the Joel K. Hubbard lease has been plugged and abandoned, having proved unproductive.

### Wayne County.

Wood Oil Company's No. 1, James Ledford farm, gasser.

Wentworth Oil Company's No. 2, Guley Sutton farm, 100 barrels.

### Allen County.

Ed. List's No. 1, Nancy Merideth farm, dry.

DeCaigney brothers' No. 4, Bishop Foster farm, 20 barrels.

Haines Oil Co., No. 4, Noah Moore farm, 25 barrels.

Schoonover No. 3, Wm. Foster farm, 100 barrels.

H. Chaney, No. 9, Williams farm, 100 barrels.

### Warren County.

Himyar Oil Co., No. 2, J. W. Williams farm, 50 barrels.

### Wolfe County.

Hoffman & Carson, No. 5, Sallie Davis farm, 60 barrels.

Paris Oil Co., No. 2, Celia Kincaid farm, 15 barrels.

### Nelson County.

The Oil World late Thursday received the following telegram: "Majestic Oil Company drilling near Bardstown, Nelson county, hit a strong flow of wet gas at 330 feet."

## PIPE LINE RUNS

WINCHESTER, Ky., Feb. 21.—The runs from the Kentucky fields for the week ending February 15th as furnished by the Cumberland Pipe Line Company are as follows:

District 1	Busseyville	325.30
District 1a	Fallsburg	312.50
District 2	Cooper	979.02
District 3	Denny	151.28
District 5	Steubenville	906.56
District 6	Canal City	156.81
District 7	Fitchburg	7,930.36
District 8	Ravenna	6,319.67
District 8a	Ravenna	4,722.05
District 9	Hazel Green	344.66
District 9	Campton	294.33
District 10	Wagersville	306.84
District 11	Beaver Creek	241.14
District 12	Ragland	1,005.90
District 13	Parmleysville	914.00
District 14	Pilot	5,656.71
District 15	Pilot	5,770.53
District 16	Zachariah	4,279.26
District 16a	Big Sinking	18,434.58
District 16b	Big Sinking	6,501.60
District 17	Ross Creek	11,050.66
District 18	Big Sinking	24,201.78
District 18a	Big Sinking	7,434.73
District 18b	Big Sinking	5,159.80
Total		113,380.37

## VALUABLE OIL LEASE FOR SALE

FOR SALE—A 500-acre OIL AND GAS LEASE

In Powell County, Kentucky.

Has one it one producing oil well, with room for one hundred more. Well is rigged up for pumping, with gasoline engine, tank, etc., all of which goes with lease. Entire tract is level, accessible, and right on railroad. Producing oil wells on adjoining farms, and on all sides. The potential value of this property is evidently very great. **TRY THE OIL GAME—YOU MAY WAKE UP TO FIND YOURSELF A MILLIONAIRE. THIS IS NOT AN UNUSUAL OCCURRENCE IN THE SHALLOW OIL FIELDS OF KENTUCKY.** For appointment, address Box 240, Lexington, Ky.

## KY. FIELD REPORT

## FOR JANUARY

There was a heavy falling off in completed work, new production, dry holes and gas wells in the Kentucky-Tennessee fields during January, says the Oil City Derrick. The month shows 160 wells completed, with a new production of 7,055 barrels, 13 dry holes and eight gas wells, against 260 completed wells, 10,166 barrels new production, 28 dry holes and 16 gas wells for December. This is a decrease of 91 in completed wells, 3,111 barrels in new production, 15 in dry holes and eight in gas wells, but this was expected on account of the bad weather that prevailed during the earlier part of the month, and the absence of drillers and laborers throughout the fields that had not returned from their holiday vacation.

The feature of the January report is the great increase in new development work which goes to show that the oil trade is alive as to activity. At the close of January there were 24 rigs up and 47 wells drilling at the close of December, being a net increase in new work of 59.

Lee and Allen counties are far in the lead of all others and there is slight chance of any of the counties catching up during the next few months. Pipe line facilities in the western section of the state has been a great boost for development work.

A New York banker who has been making some investigation into the outlook for various industries said: "I was rather surprised to find out when I looked into the matter that whereas steel production of the country between 1914 and 1918 increased 90 per cent, and production of copper increased 70 per cent, there was an increase of only 30 per cent in production of crude oil. Of course, 1914 was a very poor steel year, and even allowing 25,000,000 and 30,000,000 tons of production, which was normal pre-war output, 42,000,000 tons of steel in 1918 would represent a 60 per cent increase. The fact that over capacity and over production are menaces entirely removed from the oil industry is what makes me regard so favorably the future of oil stocks in the new industrial era. Then, the uses of oil are just beginning to expand—a development of great aid to producers of high grade oils with large gasoline and by-products content."

The outlook for production of automobiles in 1919 is that all manufacturers will soon be back into quantity production. Something less than 1,000,000 cars were manufactured and sold in the United States in 1918, compared with more than 1,700,000 in 1917. While the manufacturers are unanimous in expectation of a big demand for passenger cars this year it would probably be unwise to predict an output for 1919 above 1917; but all indications are that 1920 will be the banner year of the industry, with new records for output in number and value of cars.

Based on an investigation made something over a year ago by the United States Government, it was figured that the average consumption of gasoline by automobile users in the United States is in excess of 400 gallons annually, so that it may be easily estimated to what an increase in the number of automobiles in use would amount in the quantity of gasoline required to supply these cars, to say nothing of the large demand which would come for other oil products essentially necessary to the operation of all kinds of motor vehicles.

There will be a big demand for farm tractors in the coming months and competition in this field will be keen. The General Motors, the Ford Motor Company and the Willys-Overland are large manufacturers of tractors, and the fight will be between these three companies. All three of them expect a heavy export trade.

The pipe line runs for last week were exceedingly encouraging. Approximately 150,000 barrels of oil were shipped out of the Kentucky fields. This of course does not include deliveries in many instances in tank cars and private pipe lines. Activity in the field continues very marked. The weather has been perfect and nothing to interfere with drilling operations. Labor is abundant, and on the whole, the outlook is most promising.

Trading on the Exchange both at Louisville and Lexington has been in great volume, and sensational advances have been made in many of the stocks.

OLD DOMINION, which was quoted in our last market letter at \$215.00, sold on our Louisville Exchange at \$300.00 per share. The buying in this stock is of the investment class, and is a high tribute both to the stock itself and to the earning capacity of Kentucky oil stocks, when the company is intelligently managed and capitalized in keeping with its holdings.

REX has advanced from \$200.00 to \$237.50, with stock very scarce. A dividend of 100 per cent was declared on this stock during the week. The par value of the stock is \$10.00.

FLESHER PETROLEUM COMPANY stock has had a sensational rise. This company is a new comer and the stock subscription books only closed a few days ago, yet the stock has advanced from par to \$1.60, and is eagerly sought for. The company reports a nice well for 75 barrels, and as is well known, the company has 4,000 acres in Lee County, some of it very promising.

PYRAMID had advanced over \$1.00 a share during the past week. It is generally believed that a substantial dividend will be paid upon this stock within the next few weeks.

HIMYAR after slumping from \$1.50 to \$1.00 a share, has on the strength of the bringing in of a good well in Warren County, show an upward tendency, and is selling around \$1.25. The reports received from the well in Warren County are most encouraging.

LINCOLN, which was a drag on the market during the past few weeks at 50c, is eagerly sought after around 75c, with the offerings of a very limited character.

There is some inquiry for McCOMBS around \$1.50.

DUQUESNE is sought at 80c.

MAJESTIC is selling around 32c, with higher prices predicted.

PAN AMERICAN suffered a severe slump, being offered at 40c with no bidders.

Thirty-one completions were reported for the week as follows: Sixteen in Lee from 20 to 500 barrels; five in Estill from 5 to 30 barrels; two in Wayne, one for 100 barrels and the other a gasser; five in Allen from 20 to 100 barrels, one dry; two in Wolfe, one 15 and one 60 barrels, and one in Warren 50 barrels.

The pipe line runs for the week were 113,380 barrels.

## FOR SALE

245 Acres, \$735

Six miles south of Scottsville, within one mile of Miller Oil pool and 3 miles of Petroleum pool and 2 miles of where a reported 100-barrel well came in recently.

## Nothing to Sell But Oil

## Will Buy Good Leases

## HUMAN SIDE OF KENTUCKY OIL FIELDS

(Contributed.)

Sometimes we see ourselves as others see us, then we can realize what fools we make of ourselves, and feel that we should go out and kick ourselves for being born fools. I have watched one oil company in particular in Kentucky. This company was organized in Winchester about eighteen months ago, and has done more to put Kentucky on the map as an oil-producing State than all the other companies in the State.

I had the pleasure of meeting the men who are at the head of this company about one year ago. In my talk with the officers of the company they

told me that their object was to build up an oil company that would live. "We are starting with a small body of land; as we get the money we propose to invest it for our stockholders in the best leases money will buy; we are going to build up a company of which the State will be proud."

Now, let's see if they have kept their word. A few days ago I met a friend from San Francisco, an oil man; the only thing he knew about oil companies in Kentucky was the McCombs Oil Company, now the McCombs Producing & Refining Company. While talking with my friend, a gentleman near us became interested in what was said. He entered into the conversation, remarking, "gentlemen, everywhere I go I hear something about this company." In fact, he said he never knew until he saw their advertisement in a paper that he bought in Van Couver, British Columbia, that Kentucky had an oil field. Now, you know what I thought—in order to get the news you have to leave home. He stated he had lived within 100 miles of Louisville all his life, then found out in British Columbia that we have an oil field in Kentucky.

In talking to a kicker a few days ago, who knocks on everything good in this world, I said to him, "why kick on the McCombs, why not some of the others," naming a few. He said, "you never hear of them, but what I kick on," he said, "is every time I go to Cincinnati, Cleveland, or Chicago, some fool will ask me something about that big oil company in your town; have they tank cars and a refinery," as though no other companies ever had tank cars or a refinery.

That, I said, puts me in mind of a man who lived in my town in Indiana; he was said to be one of our wealthiest citizens, who was never known to be in favor of anything in the way of improvements; he fought every movement for streets, sewers, or anything else that was for the improvement of our city. If he had nothing else to knock or kick on, it was on another man in our city, who erected more good big buildings, was in everything that helped the city and its people. One day a friend of the progressive citizen said, "why in Sam H— do you find fault with this man; does he ask you to help put up his buildings, does he bother you about helping him in any way?" He then stated, "why, that man is ruining all of us old property owners. Why, every tenant I have wants me to put in steam heat in my buildings; they want laboratories and baths in their houses. If we don't do it, they leave and go to him, and if the fool hasn't it, he will build it for them; why, he will die in the poorhouse; he keeps his name in the papers all the time; you would think that he was the only man in the city."

Now, that is just what is the matter with lots of knockers on the McCombs Company. Just because the McCombs Company is not hiding its work, and is letting the people know that Kentucky has a sure enough oil field. It's president is one of the best known men in the State of Kentucky; in fact, wherever they raise fine cattle, there Abe Renick, like his father and grandfather, is known to be a hustler, and always

up and doing things. That's what he is doing in the oil business. One hundred wells in a year's time; started in a small way, with less than 50 acres improved territory and today they own some of the very best leases in Kentucky, and many more good ones ready as fast as they get the rigs going right after the fluid; and they are paying good, fat dividends.

So you knocker, knock, then watch the McCombs Company grow. You knockers will say then, "I told you so." Everything Abe Renick goes into he makes it a winner.

Say, boys, isn't this a good old world after all; even though some people have more gray matter than the rest of us knockers—while the winners say nothing, and saw wood.

## An Oil Proposition

### Conducted on a Business Basis for Conservative Business Men and Women

One-half of proceeds from net production set aside to repay to investors their investment in the company, while at the same time they share proportionately in any dividends declared by the Company.

#### READ THIS CONTRACT WHICH IS MADE WITH STOCK PURCHASERS

This Certifies that there has been filed in the office of the company, the subscription of \_\_\_\_\_ shares of stock in Hoffman Oil Company of Kentucky, for which was paid the sum of \$ \_\_\_\_\_ in cash and the said purchaser is therefore entitled to participate in proportion to the amount invested, in the special bonus agreement authorized to be made with those who furnish the first \$1,000,000.00 of working capital for Hoffman Oil Company of Kentucky, as follows, to-wit:

- 1st. One-half of the net proceeds from the oil produced from all the wells owned by the company, shall be prorated and distributed quarterly (beginning March 31st, 1919), among the subscribers to this fund until the entire cash investment of each subscriber has been returned in full. "One-half of the net proceeds" shall be construed to mean one-half of all the oil produced and sold by the company—all expenses of production shall be paid from the remaining one-half of such proceeds.
- 2nd. A statement of the production and net proceeds therefrom shall be prepared on March 31st, 1919, and each quarter thereafter, and a copy thereof shall be mailed to the last known address of each of the subscribers to this fund, together with remittance for his or her pro-rata part of the proceeds as herein outlined.
- 3rd. This special "Refund" contract shall be issued only to the purchasers of Treasury Stock.
- 4th. The total of all such "SPECIAL REFUND CONTRACTS" so issued shall not exceed \$1,000,000.00.

The intent of the foregoing "Special Contract" is, that those who furnish this \$1,000,000.00 of working capital for early development of the company, will receive a special bonus as above outlined, in addition to their share of the regular profits of the company. The ownership of the stock purchased above, gives the subscriber his full proportionate part of the profits of the company, from whatever source received or made by the company, so long as the subscriber may retain his stock in the company, even after having received back the entire investment in cash, through the "Special Bonus" as outlined in this contract.

The Company already has 24 producing wells. It paid the first 5 per cent to all holders of Refund Certificates on December 31st, and next disbursement will be on March 31st, next. More than 165,000 acres of selected oil and gas leases in Kentucky-Tennessee. Over 6,000 acres in proven oil bearing districts. The Company has recently secured valuable leases in the wonderful "gusher" oil well territory of Texas.

This opportunity is worthy of investigation by the most conservative investors. The Company is conducted on a safe, sane basis by men who have the knowledge, ability and energy to carry the Company through to success in spite of any obstacles. Write for full particulars or call at the office of the Company.

## Buys Valuable Lee County Acreage

The Sixty-Two Acres Shown on the Accompanying Map With Two Producing Wells, Power, Tanks, Pipe Lines and All Equipment

Located within 2,500 feet of the already famous "Della Hargis" lease of the McCombs Producing & Refining Company, which company paid \$261,000 for a three-quarter interest in the 116 acres contained in the "Della Hargis" and "Rena Butcher" tracts shown on the map and joining the well-known "Shearer Tract" of the Hopewell Petroleum Company.

GREATER TODAY THAN WE WERE YESTERDAY  
SMALLER THAN WE'LL EVER BE AGAIN

### "Watch Us Grow"

7 PRODUCING WELLS,  
4 MORE DRILLING,  
11 MORE CONTRACT-  
ED FOR,  
4 DRILLING RIGS NOW  
OPERATING.

#### ABOUT OUR LATEST PURCHASE

The purchase of the sixty-two acres in Lee county known as the "John Ashcraft" lease and shown in the shaded tract on the accompanying map, is the most important deal in our brief career. This property is in a district where real "big stuff" prevails, and joins the famous "Shearer Tract" of the Hopewell Petroleum Company and is within 2,500 feet of the "Della Hargis" lease of the McCombs Producing & Refining Company. Our "Ashcraft" wells are completely equipped and pumping oil every day, and a drilling rig is already on the lease, which will be put to work drilling Well No. 3 on this property without delay.

Fifteen thousand acres in Lee, Estill, Breathitt, Bath, Wolfe, Floyd, Lawrence, Johnson, Magoffin, Knox, Whitley, Nelson and Spencer counties, Kentucky, and Scott and Campbell counties, Tennessee.

#### A BRIEF SKETCH OF OUR PHENOMENAL GROWTH

Thirty days ago we had but one producing oil well. In that brief period of time we have acquired two more valuable properties in the "Ashcraft" lease in Lee county and the holdings of the May Day Oil Company in the Ross Creek district which we bought two weeks ago. Today we have seven producing wells with prospects of bringing in a new one almost every week. Our present production capacity is over \$500 worth of oil a day, and barring unforeseen disappointments, with the wells drilled and new properties acquired this month we will produce and sell

## Over \$15,000.00 Worth of Oil During the Month of March

#### OUR LEE COUNTY PROPERTY

No doubt the most valuable of our holdings is the "John Ashcraft" lease in Lee county, which we have just purchased at a price which we think makes it the greatest oil property investment made in Kentucky in many months. This property lies just southeast of the famous fortune-producing wells of the "Big Sinking" district. It has two wells already drilled and connected with the pipe line from which we will begin pumping and selling oil at once. All necessary tanks, pipe lines, power and other equipment is installed and in perfect working order. The drilling of the two wells mentioned proves the lease and considering the prospects of this property together with the values placed on adjoining and other nearby properties we feel that in the acquisition of this lease we have taken a step well on the way toward making Majestic the greatest of all Kentucky oil companies. There is a drilling rig now on the lease which will be put to work at once. The lease affords locations for between fifteen and twenty wells and in line with our policy of speeding up development and production the drilling of new wells on this lease will proceed as rapidly as weather, labor and other conditions will permit until the lease is fully developed.

#### OUR ROSS CREEK HOLDINGS

The "Ross Creek" district in southeastern Estill county, is one of the most active and productive pools in the entire State. It was here that we drilled our first well where we have since drilled two more wells on our original holdings. In addition to these we recently purchased the entire Ross Creek holdings of the May Day Oil Company, on which there were already two producing wells and two more drilling. These properties join each other and both are completely equipped with power plants, pipe lines, storage tanks and all equipment necessary for their proper and profitable operation. We now have five wells on these properties with a production capacity of more than \$500 worth of oil per day. We are continuously drilling new wells here and we expect to continue an aggressive development campaign until every location has been drilled into a producing oil well. Every new well drilled increases our daily income to the extent of its production. Our Ross Creek properties are proven and we can feel certain that every well drilled will come in an oil well. We know the oil is there. We are pumping it out of the ground every day. In order to get more it is only necessary to drill more wells and this is being done as fast as it can be accomplished with men, money and machinery.

#### OUR "BARDSTOWN" BET

In our No. 1 well, which is now drilling near Bardstown, in Nelson county, we hope to bring our stockholders the greatest returns ever paid on an oil investment in the State of Kentucky. In this territory we have several thousand acres of leases selected on the advice of oil experts and geologists of proven ability. The fact that an oil well has never been drilled in this territory does not discourage us in the least. Pioneering, when successful, is a most profitable pastime—especially to posterity. It was such men as Daniel Boone who paved the way for Kentucky to become one of the greatest Commonwealths in the Union. Drake—by the drilling of the first oil well—made it possible to propel the wheels of commerce by a product of Mother Earth. Every great oil pool had to be "discovered." The "Big Sinking" district of Lee county was "discovered" by the drilling of the first oil well. If we get a dry hole at Bardstown we will lose but a small sum spent for drilling. If we get an oil well our holdings there may be worth millions. Every oil pool in the country was "discovered" by some red-blooded individual or company who had enough money and nerve to drill the first well. Our experts say we'll get oil at Bardstown and—we're betting a few thousand dollars against millions they're right.

#### Thousands Acres of Slected Leases

Frequently the largest profits of great oil companies come from increased values of untested or "wildcat" acreage. We have fifteen thousand acres of carefully selected leases scattered through the States of Kentucky and Tennessee, several hundred acres of which is close to the famous "Big Bird" well on Wolf Creek, in Breathitt county, where prices of leases increased from ten to twenty fold almost overnight. By distributing our leases over a broad territory we have an opportunity to profit by the drilling of a well near any of our leases. A lease which is worth but a few hundred dollars may become worth thousands or even millions in a few weeks or months. Oil has already been discovered in more than fifty counties of Kentucky. We believe there are greater probabilities of the opening up of new pools in Kentucky today than ever existed before. Every new well drilled in the vicinity of any of our leases tends to enhance their value and prove the prospects and possibilities of our own holdings. In the selection of our leases great care was used and due consideration was given to location, geological formation, and all other facts and conditions tending to establish the absence or presence of oil in paying quantities.

### And We're Not Satisfied Yet

We started in to make Majestic grow. We have succeeded beyond our fondest hopes, but we'll never be satisfied until we have made Majestic the greatest oil company in Kentucky. We'll admit that we will have to "go some" to do this for Kentucky boasts some of the cleanest, best managed and most substantial oil companies in the country, but we feel equal to the task. No doubt the growth of Majestic has been one of the most remarkable in the history of the oil industry in Kentucky. We have met and overcome all obstacles. The experimental stage is passed and—our success is assured.

**YOUR OPPORTUNITY** Oil companies secure funds with which to purchase and develop properties by the sale of stock to investors who invest for profit. The profits derived from the production of oil are divided among the stockholders in the form of dividends. While we are not "broke" by any means, a large sum of money will be needed to carry out the extensive development campaign which we have planned, and we will continue to sell stock to our present stockholders and others until a sufficient sum has been subscribed, when our books will be closed and no further subscriptions taken by us. The best oil investment that can be made is in the stock of a young company, the success of which is practically assured, but in which stock may still be had at par or under. Majestic offers investors an opportunity to get in on the ground floor and grow as Majestic grows. The period of great risk has been safely passed. Majestic stock is now an investment which holds our assurances of a sufficient income within the next few weeks to put it on a substantial dividend basis.

Buy Merchants Oil Stock This Week

### 10 REASONS WHY

- (1) Small capital: only \$75,000.
- (2) Par value of each share, \$1.00.
- (3) Operating in proven fields of Allen county, the oil spot of low drilling costs and good production.
- (4) "Getting oil as a business;" selling stock to get the oil.
- (5) Energetic and experienced management.
- (6) Own 75-acre lease near Kentucky's biggest gas well Breathitt county.
- (7) Own leases in the North pool and South pool, Allen county.
- (8) Drilling machine operating exclusively for this company.
- (9) Last week to buy stock at 2 shares for \$1.00.
- (10) Production now; arrangements under way to pipe it.

## Thompson-Mahoney Oil Company

Incorporated

Producers of Kentucky High-Grade Petroleum

CAPITALIZATION \$200,000.00

**T**HOMPSON-MAHONEY OIL COMPANY was organized some months ago by a small group of successful business and experienced oil men, for the purpose of developing proven oil leases at Oil City, Barren County, Kentucky. A large sum has been spent for drilling equipment, machinery, and drilling wells, until today the company is producing and shipping oil, and is assured of success. No stock was offered until this success was assured. The directors believe that it is a wise business policy to operate more rapidly and thereby increase their production and profits; therefore they have authorized the sale of a portion of the treasury stock for the purpose of purchasing additional drilling equipment. This Company is essentially "A business man's Company operated by successful business men and Practical Oil men."

WELL No. 3.  
This well was brought in at 400 feet. It is connected with the pipe line, and pumping oil daily.

## First Stock Offering At Par \$10.00 per Share

**5 POINTS** Why this is a conservative  
Business Man's Investment

- PRODUCING—From Five Wells. Two more drilling.
- SMALL CAPITAL—Means large profits from small production.
- LOW COSTS—Shallow depth and ideal location make costs low.
- LARGE INVESTMENT—Own complete drilling and operating equipment.
- ABLE MANAGEMENT—By practical oil and successful business men.

**BUY NOW—BEFORE OUR PRODUCTION INCREASES**

A Dividend will be announced in a short time.
